VOL. II.

PARIS, BOURBON COUNTY, KENTUCKY: TUESDAY, NOVEMBER 27, 1883.

NO. 183.

THE new Christian Church at Morgan, was dedicated Sunday.

THE sun doesn't regard the new change of time; neither does the moon.

W. T. Overby will now have to buy tobacco low and sell high-all on account of twins at his house. THE Rev. Mr. McMillan will conduct

union Thanksgiving services at the Christian church Thursday.

last week, by smothering.

J. M. BURRIS, a prominent farmer in Bracken county, killed himself by the accidental discharge of his gun, Saturday.

REARDON, a stewart at the Lexington Asylum, is now called upon to step out of the way for Mr. Marrs, the former stewart.

ing to arrest a cow-thief.

JAMES FISHER got his leg broken near Flemingsburg, by being thrown from a wagon with a party of hunters, while the horses were running away.

THERE are near one hundred witnesses to be examined and twelve eminent lawyers employed in the Robbins and Smart case, now on trial at Flemingsburg.

THE steamer W. P. Thompson, plying between Vanceburg and Cincinnati, has been sold to a railroad company for a transfer across the Cumberland river, for \$8,000.

THE K. C. will sell round-trip tickets from and to all stations on Nov. 28th and 29th, at one fare. Tickets good to return on December 2d, at 2 cents per mile for round trip.

J. W. DAVIS & Co. are giving away boxes of clear Havana cigars to their customers. A man that doesn't smoke, ought to be made to smoke when he can get them that way.

CAPT. TOM HENRY, Clerk of the Court of Appeals, has been on a three-weeks' sprce, and has vacated his office to his deputies, retiring on \$150 per month, and is now in Morgan county, cutting up high.

been flying all over the State for the last ten years, is now nosing around for carcasses in Fleming county, and creating much consternation among the citizens.

SCHWARTZ BROS. have received the new furniture of their palace saloon, which is vail! the finest in the blue grass district, and equal to any in Cincinnati or Louisville. They will move into their new building Satur-

BEV. DORSEY sold to Jas. K. Davis, on yesterday, the yearling Tom Turkey that stood at the head of his flock the past season, which weighed 42% pounds gross, and 34 net. Price paid, \$10. Mr. Davis shipped the bird to his friend Chas. Hecklinger, N. Y., as a Thanksgiving present.

JOHN K. POLK, of Harrodsburg, and a brother of Wm. Polk, of Lexington, formerly of this city, who was clerking for Dr. Tabler, railroad contractor on the K. C. extension, shot and killed a man named Mart Owens, who was drunk and wanted to whip him, near Mt. Vernon, last Friday. Owens got down from his horse, pulled his coat off and went into the house for a fight; Polk ordered him to leave, and shot him as he was going out of the door.

OUR Court-house time has been changed back to the old standard, to accommodate those who employ servants-most day laborers having positively refused to go to work before seven o'clock. A reduction of their wages would have been the proper thing. This thing of having two times will result in confusion, and the new standard time will eventually rule, just the same as watches and clocks did over pioneers who guessed at the sun time by the door shadow on the puncheon floor of their primitive cabins.

At the Sheriff's sale of the property of H. M. Rucker, known as Ruckerville, Saturday, 29 lots and cheap residences sold for \$5,530.50, and his personal property for \$1,363.95. The amount being sufficient to satisfy all of the attachments, the sale was stopped and two lots remain unsold. Since the sale, Ann Kelley has levied her attachment which had been withdrawn, as well as several more have been made, and still more are to come. All of the property sold high, save the piano, which was bought by Capt. Bradshaw, for \$23. Persons who claim to know, say that Rucker's indebtedness here will reach \$30,000. He is now located at Burlington, Kansas.

Boxes of Clear Havanas Given Away.

J. W. DAVIS & Co., a very enterprising firm of merchant tailors and clothiers in this city, are constantly making innovations from the old way of doing busines. In fact, they never get left on anything new. Their last innovation. Mabley the boss innovator cannot beat. They have just received a large invoice of clear Havana cigars, and are giving away boxes of fifty, to every purchaser of \$10 worth of goods-no matter whether it be a suit, over-coat or anything else to that amount or upwards. Their first intention was to give them only with fine suits and overcoats, but they changed so as to give every one a chance-hence the \$10, system.

Something About Free Turnpikes.

A FEW weeks ago, this paper, for want of something out of the old ruts in way of news, and for the purpose rf getting the people to thinking and talking, advocated that a system of free turnpikes should be inaugurated, and without giving the matter deep consideration, about half way considered that it would be right. Now, since the Kentuckian of last week gave the matter much encouragement thinking it would be an im- Only square meals are to be served on them. mensely popular movement, we have given the subject much thought and after a deep seriously ill condition, at his father's resiand thorough investigation, this paper, in dence. behalf of all that is just and right, is free to espouse the cause of the minorty party and the unpopular side of the question, and vote Madison has another killing, making two NO to the proposition of free turnpikes. We take this side of the question for various reasons, namely:

1st-Because it would be unconstitutional and undemocratic to rob one corporate body of its rights and allow many other sister associations the right of acting as a body; and that it would have a tendency of undermining States Rights of it's privileged powers, and would have a drifting tendency to mon-

archial powers. . . 2nd-It would be as impracticable and as dangerous to the people at large as it would be unjust for the county to legislate the Kentucky Central Railroad out of that por-WENTWORTH, a Boston turkey shipper at tion of the road lying in the county, against Cynthiana, lost fifty turkeys in one night the will of it's rightful owners and make it free to the traveling public, the stock and

other freight shippers. 3rd-It would be wrong to the citizens of the various towns, widows and infant heirs wherever they are found, to have an unnecessary tax forced upon them when they will in return receive no practical benefit therefrom; that it would, in other words, be wrong for them to be forced to pay a heavy

toll tax when they never use the pikes. 4th-It would be a gigantic wholesale robbery of the citizens to force the county to buy a two-thirds interest in 220 miles of pike JACOB GEIER, one of the leading members in which it now owns one third, at a cost of of the Swiss colony at Bernstadt, Laurel \$3,000 per mile, aggregating \$660,000, and addcounty, was shot and killed whilst attempt- ing thereto the whole of twenty miles of the dependent candidate for City Clerk of Cov-Maysville & Lexington pike at a cost of \$10,000, per mile, aggregating \$200,000, the grand aggregate being \$860,000, to say nothing of a salaried board of officers for the county to be created, consisting of a President, Vice President, Secretary Treasury, and a board of twelve Directors and a horde of sub contractors numbering a force of not less than 500 necessary to operate and keep in repair 240 miles of pike, running the grand aggregate to near a million of dollars the

5th-We are opposed to the creation of the extra offices alluded to, whereby rings may be created and an endless amount of corruption be brought into existence while the citizens would have to sit idly by with their hands tied and submit to a wholesale robbery, helpless as infants to resist.

6th-It would be wrong to force those who are able to enjoy the luxuries of paying their own toll, to pay for the same luxuries for not only the county, but the State and the United States.

We could go on and number plausible objections at a voluminous rate, but we trust that the foregoing are sufficient to at once set the minds of thinking men at work in the right direction. We repeat that the project would be unwise, undemocratic, unjust and dangerous to the system of States' THAT same old belled-buzzard which has Rights, and altogether impracticable except by the highwayman's system of making the citizens throw their hands up and submit without resistance. In conclusion, we say nati, and Sunday night the Grand French that the violent system of robbing corporations and private individuals of the rights of free citizens, must not and shall not pre-

Assistant Postmaster General Hatton's Order on Unpaged Publications.

WASHINGTON, November 22.-The followis the full text of Mr. Hatton's order in reregard to unpaged "inserts" in publications of several classes:

"From and after this date that portion of ruling 454, page 704, January, 1883, Postal Guide, requiring the consecutive paging of inserts in magazines or other periodicals, hind will not be enforced, and legitimate publications of the second class, which contain unpaged inserts, should be treated as having lost no privileges under the law, which is extended to matter of that class. Such publications, when the advertising matter is so much in excess, or out of proportion to the reading matter as to properly raise the question whether or not they are, in their entirety, published primarily for advertising purposes, cate should be submitted by the mailing the Postmaster to the Department for examination, when the same rules that govern other classes of publications will be applied, thus reducing the question to two issues, namely, approval of the matter presented, or its exclusion from the mails as matter of the second class.

"Postmasters are requested to make a critical examination of the class of publications named when presented for mailing, and in all cases when, in their judgment, they believe an attempt is being made a publisher through the use an excessive number of 'inserts,' to violate that portion of the statute (see Section 185, page 73, Postal Laws and Regulations) which declares that publications which are published primarily for advertising purposes can not be admitted to the mails as matter of the second class, they should, before mailing the edition, require of the publisher a deposit of third-class rates of postage, upon condition that, if after presentation to the Department, the matter is adjudged to be entitled to pass through the mails at the pound rates, the difference in postage will

The Needs of the Navy.

WASHINGTON, November 20.—The annual report of Admiral Porter is notable for his criticism of the new armored steel cruisers designed by the Naval Advisory Board as being deficient in canvas and so constructed as not to work under sail. This in time of war would be a fatal defect, as all coaling stations would be closed against us, and in time of peace naval vessels should cruise under sale for the sake of economy. The Admiral believes in the immediate construction of a large number of swift vessels with powerful guns, and thinks we could build twenty large ships in two years. Prompt attention to lake defenses he considered of prime importance, and he sees no reason why we should not commence to build on the lake shore two of the heaviest iron-clads, with powerful guns and great speed.

NOVEMBER STORMS.

Heavy Damages to Several Portions of the Country by Floods and Cyclones,

Indianapolis, Ind., November 21.-Nearly five inches of rain has fallen in this city since Tuesday morning, and 3.71 inches since 5 o'clock this morning. The result has been a very damaging overflow of Pogue's Run, which passes through the center of the city. The streets are flooded through a district more than a mile long, and in three places half a mile wide. The Bee Line, Wabash, and Air Line tracks east are under water, and the bridges in such an uncertain condition that trains are unable to enter the city. The Chicago train over the Pan-handle is also delayed. The I., D. & S. have abandoned all hope of sending out a train, while traffic over both the Vandalia and I. & St. L. is also extremely uncertain, on account of washouts. The damage in the city from the flood will not be less that \$125,000.

The lumber yards, furniture factories, and coal yards suffer heavily. At nine o'clock the water was three feet in the office of W. B. Dickson & Co.'s, lumber yard. The railroad tracks east of the union depot are covered with water, and a train arriving about nine o'clock was unable to reach the depot. The new sewer on East Wash

ington street was badly damaged. A bridge at Cartersburg, on the Vandalia Railroad, seventy miles west of this city, was washed away to-night by high water. The track of the Jeffersonville, Madison & Indianapolis Railroad is covered with water near Franklin, and trains are unable to pass. Telegraph communications south and west is seriously interrupted by the rain and flood.

VINCENNES, IND., UNDER WATER. VINCENNES, IND., Novembor 21.-The great rains of yesterday and to-day have flooded the whole country, and to-night, about 7 o'clock, the great dam of the Spring Lake Ice Company gave way, and the entire eastern portion of the city is completely submerged. Two feet of water covers the Union depot platform, and railroad tracks are being swept away.

A ROBBER'S VICTIMS.

Four Murders Committed in One Michigan Heuse.

The Victims Shot in the Head in Bed After Being Chloroformed-Bob.

JACKSON, MICH., November 22 .- This morning four persons, Jacob D. Crouch, aged seventy-four, a widower; Henry White, aged thirty-eight, a son-in-law of Crouch; Eunice White, aged thirty-three, a daughter of Crouch, all of Summit Township, Jackson County, and Moses Polley, aged thirty-six, of Transfer, Mercer County, Pa., were found murdered in their beds, all having been shot through the head bethe ear. They are supposed to have been chloroformed first, as no signs of a struggle appeared. Each victim was lying as if asleep, and the odor of chloroform was noticeable when the bodies were discovered. Mrs. White was also shot through the left arm. No clue has as yet been discovered, although tracks around the house indicate that a guard was placed while murders were being perpetrated. Crouch was a wealthy farmer living seven miles southwest of Jackson, and the owner of an extensive sheep ranch in Texas. It is rumored that he had just received about \$50,000 from Texas in payment of sales made on the ranch. Bankers here state that no money was deposited by Crouch, and it is presumed the money was in Crouch's hands. Polley was stopping at Crouch's, having just come from Texas with a large amount of money, for the purpose of buying blooded stock. The theory is that he (Polley) was followed from Texas by the murderer or murderers for the purpose of robbery. The house was thoroughly ransacked, and everything of value was carried away. A young girl, an adopted daughter of White's, and a negro, aged eighteen, were sleeping upstairs. They say they heard no firing, although the negro says he heard a thumping noise about the middle of the night, and thought it was caused by a fierce wind which was blowing. Mrs. White was expected to become a mother in a week or ten days. The murder has caused intense excitement, and hundreds of people have flocked to the horrible scene. The officers are very quiet on the subject, but are hard at work trying to get a clue work upon.

Crouch slept in an alcove opening in the sitting room, near the front part of the house. His daughter and her husband occupied a front bedroom, while in another bedroom, opening also in the parlor, lay the remains of Polley. Crouch was lying with his face to the wall, and had a bullet hole in the left side of his head, two inches back of the ear, the ball passing through the brain. Death must have been instantaneous. White was shot twice, one ball entering on the right side of the neck, three inches below the ear, severing the artery, the second ball entering the temple near the right eye. He was discovered lying on his back, as if peacefully sleeping. His wife was shot five times, and made a hard struggle for life, as was judged by the position of her arms and the disorder of the clothing. Two balls went through her right arm, one through the left, and one through the right breast into the lungs, one through the chin and neck, and another through the wrist. Polley was shot twice, one entering the opening of the right ear, directly into the brain, the second passing through the chest from the right side. There were no indications of a struggle. The Sheriff believes the shots were fired by one person and one revolver, as a number of empty cartridges found on the floor

all show the same caliber. There are conflicting rumors regarding the use of chloroform. The physicians claim none was used, but the theory is of one person doing such a butchery and the testimony of the first neighbors at the scene, who claim that the chloroform was suffocating. The young negro Boles was arrested and placed in jail to await the result of the Coroner's inquest, which will be held to-morrow. Crouch was worth about two million dollars in property in Jackson County and sheep ranches in Texas, near Forth Worth, and leaves two sons and one daughter. A pocketbook containing \$100 and a certificate of deposit for \$500 was found on a window sill in White's room. An empty cartridge box of thirty-two caliber was found in the negro Boles' room.

Butler Sued By the Soldiers' Home.

Boston, November 23.-The National Home for disabled volunteer soldiers, organized under the laws of the United States, and having its usual place of business at Hartford, Conn., has brought suit in the United States Court of this district against General Butler. The declaration alleges that the defendant is indebted to plaintiff for \$15,000 for money had and received in 1879, and a further sun from January 1. Defendant has filed a plea in abatement, stating that the plaintiff corporation is not now and never has been a cltizen or resident of Connecticut; that it has no usual place of business in said Hartford or State; that the Circuit Court has no jurisdiction over said cause, and no power to entertain and adjudicate upon the same, it not being a controversy be-tween citizens of different States.

THE EGYPTIAN WAR.

Hicks Pasha's Army Completely Annihilated by the False Prophet.

London, November 22 .- A dispatch to Reuter's Telegraph Company, dated Cairo, at 8:25 this morning, says the army of Hicks Pasha had been destroyed by the forces of El Mehdi, the false prophet. Intelligence of the disaster was brought to Khartoum by a Coptice official. The fighting is said to have continued from the 3d to the 5th inst. The engagement is said to have resulted in the complete annihilation of the Egyptian troops. It is stated that a European artist was the only person who escaped. El Mahdi's forces comprised, it is estimated, \$305,000 men. and included Dervishes, Bedouins, mulattoes, and regulars. The force under Hicks Pasha comprised 25,000 men. He had with him ten British officers. O'Donovan, of the London Daily News, and and an artist connected with a German illustrated paper, also accompanied the army. The battle was fought near El Obeid. El Medhi first sent forward the Dervishes, declaring they would vanquish the enemy by divine aid. Subsequently the regulars joined the attack, and later the engagement became general. The army of Hicks Pasha, which early in the battle was divided into two bodies, was subsequently reunited and formed a square, which the forces of the false prophet broke after three days' desperate

ANXIOUS TO DIE.

A Murderer's Defiance of the Terrors of Death.

Andy Taylor, Impatient for Execution, Tells the Hangman to "Hurry up With Your Racket."

LOUDON, TENN., November 23 .- Andy Taylor expiated his crimes on the gallows at 3:15 p. m. to-day. He maintained a stolid indifference to the last. His parting words on earth were blasphemous, and breathed a spirit of murder. His demeanor on the gallows was wonderful, and unparalleled in the annals of crime, and fully in keeping with his desperate nature and atrocious deeds. He ate a hearty breakfast and dinner, and slept soundly last night. He refused to see any minister. His sister-in-law and little child called on him half an hour before he was hung and wept bitterly over him, beseeching him to pray, but he remained unmoved and said he would die like a man. While his arms were being pinioned he was asked if he wished to say anything to the crowd, and he replied, "Not a G-d d-n word." He mounted the gallows with a firm step and calmly surveyed the crowd with a half-smile playing about his features. When the noose was being adjusted Sheriff Springfield, of Hamilton County. asked him if he felt angry towards him. Taylor replied: "G-d d-n you, I'd rather drink your heart's blood than any man I know!" He then asked a friend to send his body to his mother, and the black cap was ad

Thus prepared, he stood fully two minutes while the knots were being tightened, and at last called out impatiently, "Hurry up with your racket." The trap was sprung at 3:15, and his body plunged forward and remained quiet. He was at the end of the ninth minute. He was cut down at the end of the twenty-seventh minute, and placed in a neat coffin for shipment to his mother. The crowd numbered about fifteen hundred, screened during the execution, and only those on and under the platform witnessed the fall. It was the first private hanging in this State. Taylor was only twentytwo years of age.

National Banks.

WASHINGTON, November 23.—The second chapter of Comptroller Knox's report shows that 262 National Banks were organized in the year ending November the largest number organized in any year since 1865. Of these 132 were in the Western States, forty in the Middle States, forty-six in the Southern States, eleven in the Pacific States, twenty-six in the territories and only seven in the Eastern States. The number of National banks in operation on November 1 was 2,522, the largest number in operation at any time. The resources of 2,501 National banks on October 2, 1883, were \$2,372,700,000. Since his last report Illinois has advanced from sixth to fifth place in National bank capital, Kentucky has displaced New Jersey, and Minnesota is now the fourteenth State, taking the place of Vermont, and displacing lowa and New Hampshire. Virginia is superseded by Wisconsin, Texas and California. In the next two years the charters of 976 banks will expire, having a capital of \$285,548,000, and a circulation of \$185,335,000.

Disastrous Tornadoes in Missouri.

St. Louis, November 23.-News has reached Charleston, Mo., to the effect that the tornado at Bertram tore Ely Brown's house to splinters, killing him outright, fatally injuring a lady, and wounding several others. None in the house escaped but a small boy. The barns, stables, cowsheds, and fences were swept away. In the track of the storm trees of the lagest size were twisted off near the ground, but, strange to say, not another house or person in the tornado's track was injured.

Displaced Heart-Queer Case of a Man in the Louisville Hospital. Louisville, November 19 .- The City Hos-

pital furnishes many curious cases for study to the medical fraternity, and the one that developed and was examined thera yesterday morning was not one of the least curious. About five months ago s laborer named Arthur Whallen, who had before been a strong and hearty man, was taken suddenly sick with purging and vomiting. Since that time he has never been well. He grew gradually worse until he was sent to the Hospital, where he has thus far been treated in vain. Soon after he became sick, there began to develop in the abdominal cavity a lump, which daily increased in size. It grew to such an extent that it began to crowd and displace the heart, so that important member has gravitated downward until now its beating can be plainly felt in the man's abdomen. Dr. Ayers has had the man in charge, but yesterday he was examined by several of the members of the Hospital staff. It is needless to say that the case is a puzzling one, and no satisfactory explanation has been offered to this strange phenomenon. The theory advanced by one of the examining physicians is that the lump is a tumor, produced by the rupture of a blood vessel, which, by being attached to the internal viscera, has displaced the heart and pulled it down into the abdomen.

Finally St. Jacobs Oil every day water slightly warmed and was recommended. I had my spinal colsalted, in which bran has been stirred at umn thoroughly rubbed with it. All those the rate of one quart to two gallons of water. By this daily practice the cow will give fifty-two per cent. more milk immediately under the effect of it, and his assistant.—The Judge. she will become so attached to the diet as to refuse to drink clear water unless very thirsty. The amount of this drink necessary is an ordinary pailfull at a time-morning, noon and night."

Dividing and Softening Food.

The finer the food when it goes into the stomach of an animal, providing it is not of a character to form a compact mass when it is wet, the more easily digested it is, and consequently the better it is for the animal. We grind the grains and cook the flour and meal that is made from them, partly for the purpose of making them more digestible. If we swallowed the grains we should have the same amount of nutriment that we have when the grains are ground, but it would be less available, because there would be a firmer resistence by the whole grain to the action of the gastric juice, and less surface for it to act upon. The effect of dividing the grain into small particles, as to the action of the gastric juice, has sometimes been illustrated by citing the increased facility for cooking which ground grain furnishes over whole grain. It requires but a short time to cook meal; it requires a very much longer time to cook whole corn. The meal presents numerous little particles for the heat to penetrate, and it does not take long for the heat to penetrate it. The whole presents a hard exterior and is a comparatively large, fine mass. When stock is in the pasture field they easily digest their food, because it is of such a character that the fibre is easily broken down in the process of digestion. But permit that grass to grow until it is fit for cutting, and cut and cure it into hay, and we have a large amount af hard, woody fibre, which must be broken down in the stomach before it will furnish the system the nutriment which it contains. If the animal thoroughly masticates this hard substance, it will go into the stomach in good shape. But that cannot be depended upon, and, therefore, it is of the highest importance that it be artificially or general debility, take Dr. R. V. Pierce's "Golden Medical Discovery." Sold by prepared for mastication and digestion. Hence we cut the coarse fodders, and to prevent the ground foods from going into the stomach in too compact a form, we mix it with the cut fodders. For the same reason we have frequently advised the mixing of cut foods, and letting them stand for a few hours closely covered. In this condition they become softened and are more readily digested. Some writers urge the necessity of bruising as well as cutting the coarse fodders. This would be better than nothing. Any process that will break up the hard fiber would be desirable, if there were no better one. But all the bruising that could be done would not thoroughly soften the fodder. Cooking, steaming, or wetting down, the mass being permitted to stand for a time before feeding, will meet the require-

In cooking certain chemical changes take place, which may be of value. Just how valuable they are we are not prepared to say. And when the cut food is permitted to stand awhlle, chemical changes take place, and these may be of more value than we know. But the principal merit of either process is to soften and make the mass more easy of digestion. Cooking, probably, does this more thoroughly than any other method, if the cooking is properly done, and the cooked food mixed with other food, and hence the eminently satisfactory results of feeding cooked food properly. Unquestionably it is better than uncooked food, but circumstances must determine whether or not that or a less expensive and less troublesome method is desirable. If the food is divided and softened, the object will be at least partially accomplished. Feeding cooked food by itself we do not believe to be advisable. The animal will gulp it down without mastication, and under such circumstances it passes into the stomach without the preparation which nature intends it shall receive in the mouth.-Exchange.

Algerian Desert Grass.

If nothing else prospers in Algeria, at least the culture of desert grass seems to promise an increasing source of wealth to the colony. veal should be cut in small, neat pieces; dates back to a period as remote as that of the "missing link" between the monkey and man. It is probably an invention of the latter, and a reasonable explanation is that the inventor, after having been driven out of every community into which he wandered, finally laid the responsibility of the invention on the link. This would go far to account for the fact that it has been missing ever since. - New York Herald.

HIS OWN EXECUTOR.

A Well-Known Gentleman's Philanthrophy and the Commotion Caused by One of His Letters.

[Rochester Democrat and Chronicle.] We published in our local columns yesterday morning a significant letter from a -A correspondent seeks information gentleman known personally or by reputaas to the origin of the accordion. It We have received a number of letters protesting against the use of our columns for such "palpable frauds and misrepresentations;" therefore, to confirm beyond a doubt the authenticity of the letter, and the genuineness of its sentiments, areporter of this paper was commissioned to ascertain all the possible facts in the matter. Accordingly he visited Clifton Springs, saw the author of the letter, and with the following result:

Dr. Henry Foster, the gentleman in question, is 63 or 64 years of age and has an extremely cordial manner. He presides as superintendent over the celebrated sanitarium which accommodates over 500 guests and is unquestionably the leading health resort of the country. Several years ago this benevolent man wisely de termined to be his own executor, and, therefore turned over this magnificent property worth \$300,000 as a free gift to a board of trustees, representing the principal evangelical denominations. Among the trustees are Bishop A. C. Coxe, Protestant Episcopal, Buffalo; Bishop Mathew Simpson, Philadelphia, Methodist Episcopal; President M. B. Anderson, of the University of Rochester; Rev. Dr. Clark, Secretary of the A.B.C.F. M., Boston. The benevo-1st-of evangelical missionaries and their families whose health has been broken in their work. 2d-of ministers, of any denomination, in good standing; 3d-of members of any church; who otherwise would be unable to secure such care and treatment. The current expenses of the institution are met by the receipts from the hundreds of distinguished and wealthy people who every year crowd its utmost capacity. Here come men and women who were once in perfect health, but neglected the first symptoms of disease. The uncertain pains they felt at first were overlooked until their health became impaired. They little realized the danger before them, nor how alarming even tr.fling ailments might prove. They constitute all classes, including ministers and bishops, lawyers, judges, statesmen, millionaires, journalists, college professors and officials from all parts of the land.

Drawing the morning Democrat and Chronicle from his pocket, the reporter remarked: "Doctor, that letter of yours has created a good deal of talk, and many of our readers have questioned its authenticity."
"To what" do you refer?" remarked the

doctor. "Have you not seen the paper?" "Yes, but I have not had time to read it

The reporter thereupon showed him the

letter, which was as follows: CLIFTON SPRINGS SANITARIUM Co., CLIFTON SPRINGS, N.Y., Oct. 11, 1883. DEAR SIR: I am using Warner's Safe Cure, and I regard it as the best remedy for some forms of kidney disease that we have. I am watching with great care some cases I am now treating with it, and I hope

I wish you might come down yourself, as I would like very much to talk with you about your sterling remedy and show you over our institution.

for favorable results.

Yours truly, HENRY FOSTER, M. D. "I do not see why anybody should be skeptical concerning that letter," remarked

"Isn't it unusual for a physician of your standing and influence to commend a pro-

prietary preparation?" "I don't know how it may be with others, but in this institution we allow no person

to dictate to us what we shall use. Our purpose is to cure the sick, and for that work we use anything we know to be valuable. Because I know Warner's Safe Cure is a very valuable preparation, I commend it. As its power is manifested under my use, so shall I add to the completeness of my commendation."

"Have you ever analyzed it, doctor?"

"We always analyze before we try any preparation of which we do not know the constituents. But analysis, you know, only gives the elements; it does not give the all important proportions. The remarkable power of Warner's Safe Cure undoubtedly consists in the proportions according to which its elements are mixed. While there may be a thousand remedies made of the same elements, unless they are put together in proper proportions, they are worthless as kidney and liver preparations. "I hope some day to meet Mr. Warner personally, and extend fuller congratulations to him on the excellence of his preparations. I have heard much of him as the founder of the Warner Observatory, and as a man of large benevolence. The reputed high character of the man himself gave assurance to me in the first place that he would not put a remedy upon the market that was not trustworthy; and it was a source of a good deal of gratification to me to find out by actual experiment that the remedy itself sustained my impres-

The conclusion reached by Dr. Foster is precisely the same found by Dr. Dio Lewis, Dr. Robert A. Gunn, ex-Surgeon-General Gallagher and others, and proves beyond a doubt, the great efficacy of the remedy which has awakened so much attention in the land and rescued so many men, women and children from disease and death.

THE HARD-WORKING MAN.

He was a hard-working man, and for a good many years he had been working twice as hard as any man ought to work.

He said he had a splendid constitution, and that he could stand it. He forgot that as years passes on the waste of the system is much. greater than in youth, while the repair of it is less.

He became weak, debilitated, nervous, and despondent. He regarded the future with dread, and said he had worked himself into an untimely But he was not taken to the cemetery at all. Instead of that, a good

friend brought him some Brown's Iron Bitters. He began to pick up strength. That was what he wanted. Brown's Iron Bitters enriched his failing blood and put new life into him. It toned

up his digestive organs so that his food began to nourish him and do him good. Most heartily does he recommend Brown's Iron Bitters. 12

For Two **Generations**

The good and staunch old stand-by, MEXICAN MUS-TANG LINIMENT, has done more to assuage pain, relieve suffering, and save the lives of men and beasts than all other liniments put together. Why? Because the Mustang penetrates through skin and flesh to the very bone, driving out all pain and soreness and morbid secretions, and restoring the afflicted part to sound and supple health.

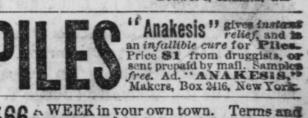

For years I was afflicted with Dry Tetter of the most obstinate type. Was treated by many of the best physicians; took quantities of mercury, potash and arsenic, which, instead of curing the Tetter, crippled me ap with mineral poison and rheumatism. The Tetter continued to grow worse, and the itching almost made me crazy. In this condition I was induced to take Swift's Specific, and the result was as astonishing as it was gratifying. In a few months the Tetter was entirely well, the Mercurial Poisoning all out of my system and I was a well man—and due only to Swift's Specific. All like sufferers should take it.
